This desktop application was developed for the new IBM PC in 1981. AutoCAD was the first CAD application to run on personal computers. AutoCAD began as a traditional 2D drafting application. Since then, the application has been continuously upgraded with added functionality. AutoCAD continues to be one of the world's leading commercial CAD applications, with more than 18 million users. Its customers include Fortune 500 companies and government entities in the United States, Canada, Japan, and Europe. The current version is AutoCAD 2020 (Autodesk, 2019). Top AutoCAD Features Easy creation, annotation, editing, and viewing of 2D and 3D drawings Real-time collaboration with other users and with mobile devices and web applications Interface improvements for better usability Multi-file importing and exporting Integration of business and geographic information systems (GIS) data Mobile and web apps that can be used on desktop or tablet devices Top AutoCAD features: Top AutoCAD features: Relational Databases AutoCAD includes the capability to create relational databases, which allow users to store and retrieve data in structured form. A relational database can help organize and store data in tables with columns and rows. Each cell contains a value or data. This feature allows users to store data and work with existing data in an organized manner. Autodesk Data Management (ADM) When used in conjunction with AutoCAD, ADM enables users to create, edit, and update data in both existing and new files. This feature simplifies the workflow for CAD data storage and management, as well as working with data at the design stage. Feedback can be automatically sent from a separate PDF editor, scanned paper, or web browser. In addition to facilitating more efficient change requests, Feedback can now synchronize the color and style of linked text and dimensions with source drawings and PDFs. Markup Assist has been improved to handle new and complex drawings created using the Customizable User Interface (CUI). EXA Formulates: Eliminate red-ink headaches, with EXA Formulate. With this powerful new feature, EXA instantly converts colors and tones to the desired output color and tone in the selected drawing viewport. EXA Formulate can even split colors and tones across a drawing layer. EXA Formulate also allows you to select the properties that you want to convert, then instantly apply the new look and feel to any drawing layer. (video: 1:50 min.) New 2D DWF Export: Share CAD files with DWF format in a quick, easy manner.
