The present invention relates to a new and distinct cultivar of *Portulaca* plant, botanically known as *Portulaca hispida*, commercially referred to as a carnation and hereinafter referred to by the name 'Fisilideg'. The new *Portulaca* plant is a product of a planned breeding program conducted by the Inventor in De Lier, The Netherlands. The objective of the breeding program is to create new compact *Portulaca* plants with numerous attractive flowers. The new *Portulaca* plant originated from a cross-pollination made by the Inventor in January, 2011 in De Lier, The Netherlands, of a proprietary selection of *Portulaca hispida* identified as code number 1009081, not patented, as the female, or seed, parent with a proprietary selection of *Portulaca hispida* identified as code number 040525, not patented, as the male, or pollen, parent. The new *Portulaca* plant was discovered and selected by the Inventor as a single flowering plant from within the progeny of the stated cross-pollination in a controlled greenhouse environment in De Lier, The Netherlands in April, 2011. Asexual reproduction of the new *Portulaca* plant by terminal cuttings in a controlled greenhouse environment in De Lier, The Netherlands since July, 2011 has shown that the unique features of this new *Portulaca* plant are stable and reproduced true to type in successive generations.

Popular Categories Julianne Moore Surprising Michael Douglas on Set Julianne Moore has some explaining to do! The Oscar-winning actress decided to surprise Michael Douglas at the set of *The Grinder* on Monday when Douglas surprised her with a bout of bad news about his failed back surgery: His back “has gotten a little bit worse than we had hoped,” Douglas told *People*. “So we’re changing our work schedule and I’m doing a little more physical therapy so I’ll be able to come back very soon and hopefully not have to wear a back brace,” he said. “I hate wearing the brace and it’s hard to forget that it’s there, but it will get better.” Douglas had surgery on his lower back in January. While Douglas is expected to return to the set in eight weeks, he’s going to take “a couple weeks off” until then. “I’m on my third set now and I’m a very heavy worker,” he told *People*. “I feel very accomplished in many ways. I have a great job, the family is really wonderful.” Douglas added, “I’m really enjoying being with [actors] Zooey Deschanel and Jason Bateman, and I have a lot of work to do. So I’m just taking my time.”

An adaptive learning classifier system for two-dimensional ultrasonic signals with noise and multiple reflections. This paper considers a classification problem for an adaptive learning system in ultrasonic images of the breast. The system is designed to be robust to noise and reflections and is also capable of detecting abnormalities. A classifier system is formed by the two-dimensional quadratic classifier, the fuzzy neural network, and the adaptive learning algorithm. Simulated experiments are carried out using digital breast images captured with a 256-channel array transducer (1.6 mm focus). Results for simulated normal and cancerous lesions are given and it is found that the simulated cancerous lesions can be detected in over 90% of cases using a classifier threshold of approximately 0.15.
