It is unclear when the name "AutoCAD" was adopted. The first published trademark application, #7467763, was filed by Autodesk on November 27, 1988, and lists "AutoCAD" as the name and "Computer-Aided Design" as the description. The earliest versions of AutoCAD (versions 1.0 and 1.1) used the name "AutoCAD", as shown in the following table. AutoCAD version year number title description 1.0 1982 CAD and drafting AutoCAD 1982 "Computer-Aided Drafting" 1.1 1983 CAD and drafting AutoCAD 1983 "Computer-Aided Drafting" 1.2 1984 CAD and drafting AutoCAD 1984 "Computer-Aided Drafting" 1.3 1985 CAD and drafting AutoCAD 1985 "Computer-Aided Drafting" 1.4 1986 CAD and drafting AutoCAD 1986 "Computer-Aided Drafting" 1.5 1987 CAD and drafting AutoCAD 1987 "Computer-Aided Drafting" 1.6 1988 CAD and drafting AutoCAD 1988 "Computer-Aided Drafting" 1.7 1989 CAD and drafting AutoCAD 1989 "Computer-Aided Drafting" 1.8 1990 CAD and drafting AutoCAD 1990 "Computer-Aided Drafting" 2.0 1991 CAD and drafting AutoCAD 1991 "Computer-Aided Drafting" 2.1 1992 CAD and drafting AutoCAD 1992 "Computer-Aided Drafting" 2.2 1993 CAD and drafting AutoCAD 1993 "Computer-Aided Drafting" 2.3 1994 CAD and drafting AutoCAD 1994 "Computer-Aided Drafting" 2.4 1995 CAD and drafting AutoCAD 1995 "Computer-Aided Drafting" 2.5 1996 CAD and drafting AutoCAD 1996 "Computer-Aided Drafting" 2.6 1997 CAD and drafting AutoCAD 1997 "Computer-Aided Drafting" 2.7 1998 CAD and drafting AutoCAD 1998 "Computer-Aided Drafting" 2.8 1999 CAD and drafting AutoCAD

It is an application used for the architecture of buildings and other structures. The product originally included a 3D building design application, which was later released separately and renamed AutoCAD Architecture. The 2D version of AutoCAD Architecture is now known as AutoCAD LT Architecture, released in September 2002. Architectural design software tools The Autodesk Architecture Product Line is a program of architectural design software tools, including Autodesk® AutoCAD® Architecture and Autodesk® AutoCAD® Civil 3D. These product lines represent a new approach to the integration of traditional drafting and design disciplines. They include tools to manage the design process, and bridge the gap between traditional drafting and design disciplines. The new software tools are an intelligent combination of standard drafting applications and powerful design tools. Autodesk® AutoCAD® Architecture and Autodesk® AutoCAD® Civil 3D provide many advantages, such as flexibility to quickly and accurately create detailed designs that meet all client expectations. The Architecture Product Line (APL) includes: Autodesk® AutoCAD® Architecture Autodesk® AutoCAD® Civil 3D Autodesk® AutoCAD® MEP Autodesk® AutoCAD® Structural Autodesk® AutoCAD® Mechanical The Architecture

Product Line Architecture is software with which architects, engineers, planners, and other professionals create and manage 3D models and 2D drawings of structures and architectural designs. Architectural modeling tools As its name implies, the Architecture Product Line Architecture is a product line of architectural modeling tools. The Architecture Product Line Architecture includes Autodesk® AutoCAD® Architecture, Autodesk® AutoCAD® Civil 3D, Autodesk® AutoCAD® MEP, Autodesk® AutoCAD® Mechanical, and Autodes 5b5f913d15

What's New in the AutoCAD?

Replace geometry: With new commands for this and seamless replace, you can change an existing part of a drawing without leaving the drawing and without regenerating the object. (video: 3:15 min.) Solver and checkerboard: Easily check a model for structural integrity. Solver and checkerboard are optimized for accuracy and can calculate mesh surface area, average face length, average edge length, and more. These features are used to check part geometry and the integrity of a structure. (video: 2:45 min.) Solve instantly: A new command to solve is designed to optimize for the experience of the user. Solve lets you automatically and instantaneously solve parts for two- and three-dimensional solids. Solve can be used to solve for symmetries of a drawing, and you can specify a tolerance distance to limit the number of input points to get a good result. (video: 2:50 min.) Models in Solve: A new command for importing and linking models directly into AutoCAD. Solve lets you import and link files in formats such as OBJ, STL, PN3D, and StereoLitho. When these models are linked, they can be viewed in 3D from the Model Browser or the Viewport. Additionally, you can customize the geometry, edges, faces, and texture of these models using editing tools. (video: 2:50 min.) Shading and Symmetry: Fully customize the viewport to share the same view in the 3D and 2D workspace. Edit shape fill: You can easily change the fill style of a shape without the need to regenerate it. For example, you can edit the fill style of an arrow or line. You can also modify the fill style of any existing object. (video: 2:40 min.) Shape Fill: You can easily fill shapes with a custom color. For example, you can use a solid or pattern fill to draw a dotted line. You can even specify that only the shape should be filled; that is, you can specify that the background should not be filled. (video: 3:00 min.) Snap to symmetry: Symmetry is an important concept in 3D and you can now snap to any symmetry axis in the 3D workspace. A new command lets you "unlock" parts so that they can snap to an existing
