May 19, 2018 Hey yo! I tried every glitch remover there was. A Little won't work and some just wants to cause problems. One of them is called "1.0.7.3" and comes with "third party" It just crashes my pc and restarts, i can't get the game to open again and it freezes up after starting the game. This is the only one that works. I have tried to create a new game profile and many other tutorials, but some are just badly explained and make mistakes. This is my
