What's New In?

The Markup Assist tool provides an AutoCAD user experience similar to markup created by a drawing supervisor. Markups may be imported directly into drawings using the Import Markup and Export Markup tools, but may also be used as a guide to add annotations or comments to a drawing or drawing template. (video: 1:50 min.) Receive feedback from prints and paper documents, add annotations, and edit content in drawings all from the same tool. (video: 1:50 min.) The Markup Import tool provides an AutoCAD user experience similar to exporting markup from the Markup Assist tool. (video: 1:50 min.) Drafting tasks such as exporting hand-drawn annotations or adding comments from paper can be automated. Viewing Displays: Switch between a full-screen display and a browser-based screen layout, then return to the browser layout with a single click. (video: 1:40 min.) A new view to the top-right corner of the Design Center that includes all your drawings and CAD viewer tabs, along with space for importing and exporting files. Use the browser-based screen layout to view drawings, draw data, and monitor progress on tasks. View the title bar, running updates, and CAD history for a drawing to see what has been recently updated, as well as which drawings in the browser are new. (video: 2:04 min.) The new Design Center provides a view into all your active drawings, drawing templates, and imported files. All drawings that you've opened, even those that you haven't saved, are displayed as thumbnails in the top-right corner. The active drawing, the title bar, and running updates are displayed in the top-left corner. When files are imported, a thumbnail is displayed for a file, along with the drawing's title, the name of the drawing template, and any layers used by the imported drawing. You can also edit the properties for an imported drawing. Explorer: Use Explorer to manage drawing information and drawing settings, including drawing templates, import and export
