Pathfinder Adventure Path has always been a game that has been played online. A recent change in the way Fantasy Grounds works has presented a downside to playing that game: it has become harder to get the game to run and it just now has the capability to do so. This has caused an issue in that the game, which is designed to run on PCs, is being played on Macs. This shouldn't be happening, because the game is designed to be a PC game. From the moment that we were informed that this was happening, we started investigating a solution. The solution we were able to find is to add a feature to the Fantasy Grounds software itself that will allow for PCs to run the game just fine as long as they are not running Mac OS. This has made a big difference in that we have been getting more feedback from PCs

---

running our game, as well as more feedback from Mac users who love the game and we hope to keep getting both of those kinds of feedback. Note: Mac users should know that if they are following the official Steps to Play instructions to install the game, that by doing so their game should be running just fine; they should have no issues at all on their machines.

We are, of course, well aware of the reason why this is not the case for many of our Mac players. Mac users who wish to help out can report a bug using the official support method.

Our goal for Mac users is to restore the game

to running just fine for PCs without any additional steps or issues on the part of the user. About The Game: Pathfinder Adventure Path has always been a game that has been played online. Fantasy Grounds version 3.2.2 and higher is required to run the game. About

video gameplay (3 chapters): Would you be mad if you woke up one morning and discovered Google Play Store and Google Play Movies "had a little too much to drink last night"? The Play Store team has announced a new feature -- music service, but it seems to be a bit more than what's advertised. The service currently only works with Google Play Movies and Google Play Music subscribers and is just a bit of a way to pull some of the library to phones without an internet connection. Once the feature is ready, the Play Store team will send notifications and allow users to download the content from the store to their device. However, it sounds a bit convoluted, and will probably require some sort of authentication to work. The free service will offer up to 5,000 songs, and will be available in different genres. Google says Play Music "will be one of the largest catalogs of digital music." It's probably safe to say that's

After a curious tree branch snaps Hal in two, his fiancée finds herself with a strange accent and a dizzying headache. And when she calls Hal... they hang up. Lara Hargraves has been guarding an important secret to herself and her friends for some time now. It's something nobody knows, and she hopes it keeps her safe.
