## Praise for Thundering Run:

---

“Thundering Run should be everyone’s new fantasy adventure game. It's easy to get lost in, the characters are like real, relatable protagonists, and each area is enormous.”—Gamediscovery

“Thundering Run takes on the fantasy genre in a big way. Truly memorable characters are a bold move that does not always lead to a coherent story... But the emphasis on action lends itself well to the title.”—AndroidWeekly

## System Requirements For Elden Ring:

NOTICE: This mod requires a custom launcher that reads a startup configuration file. For example, the default launcher, GungHo Project's launcher, does not read config.txt files, and cannot read my custom launcher. Therefore, if you installed this mod with GungHo Project's launcher, you cannot use the Dark Souls 2: Scholar of the First Sin config file. This mod will not work if you use the defaults when installing it, unless you manually add the config file.
