GAME SYSTEMS ELDEN RING game (in short called game system) • THE TARGETS In ELDEN RING game, the player uses a different, graphical arrangement which is connected to a game board composed of a seven-layered structure. Targets, which come in two colors, appear on these different layers according to their positions and alignments. These targets determine the direction and movement of your own character. The deeper the targets are drawn on the layers, the more they affect your character. In ELDEN RING, you must not only defend yourself, but also attack the targets by moving your character to attack. • THE ULTIMATE SYSTEM The ultimate aim of ELDEN RING game is to invade the layers of the main board and destroy all the targets present there. There are a variety of special movement patterns that are used for invasion which are called System Moves. Every System Move is a new, distinct action that grants access to the various treasures in the layers of the board. The development of System Move skills to gain access to new treasures and new strategic possibilities has thus become the ultimate intent of the game. • THE FIGHTING SYSTEM In this game, you are only allowed to take one action at a time. It is not possible to attack the targets on one layer and then move elsewhere to attack them again. If the target layer is attacked, then the attack is successfully registered and the character moves towards it. However, if you do not attack a target for a long time, then the target moves up or down layers, and if it reaches the end of the layer, then it disappears from the board. The battle of attacking targets and defending against them become quite a realistic challenge. The battle system contains a variety of special skills that can be used to fight. In addition, there are many special skills that you can learn to increase the effectiveness of your attacks. Your fight style and your personal play style completely determine the combat conditions in your attack. • THE ACTION SYSTEM You can draw a variety of Abilities from a set of Ability Cards and immediately use them during battle. There are various attack and defense strategies that can be obtained from Ability cards. By using these card effects during battle, you can create diverse special abilities, and use them to easily take down enemy bosses. Equipping Ability cards and gaining new attacks is a continuous process that helps improve your character. • SPECIALIZING YOUR
