Goat Simulator is the awesomest game of this generation, available on PC Windows/Mac/Linux/PS4/XB1 and soon iOS and Android. Every choice you make, action you perform and injury you inflict is sent straight to the goat simulation technology where it is crunched, processed and stored in the contract database. Coming soon is the Goat MMO Simulator, a game so realistic it will actually have a goat sim online option. Yes - this means you. Sign up at This game is completely free to play. But the in-app purchases contain items which will drastically alter gameplay and may negatively affect performance. We're not babies, why would we do that? This video is our biggest work yet! The HD Goat Simulator gameplay gets a big update with new features, and that includes a new Goat Simulator Girls! Watch our 4K Goat Simulator gameplay here: This video was recorded using the official CODENAME PigFace_McChicken build which was not officially released to the public. I also use Add-Ons to modify gameplay for more fun. *Hammer of FALLOUT 4 *Kitsune's Mask *SAVE THE BRITISH CAPTAIN *REDO DAWGS *Game of Gestures *Nice Kitty Good old Guerrilla Games have come back from the dead and brought back their infectious love for gameplay and action mayhem in Metal Gear Solid V: The Phantom Pain. As a special gift to those who manage to beat the game, Metal Gear Solid V: The Phantom Pain brings you a new mode called 'Naked Snake' where you play as Snake, and you get to explore the horrors of war in a completely nude state. Oh, and playing in this mode also unlocks the option to play the game in a mode where Snake's character is superimposed on your own body. If you want to enjoy Metal Gear Solid V: The Phantom Pain in a properly themed outfit, you'll have to stay in this state. As the scene in the video shows, Snake can't see anything around him. And that's the point of the mode. If you play as Snake, you feel the horror of war, the stench of battle, and the fear of death.

We're sorry, but this game does not support web browsers without JavaScript enabled. Thank you for your feedback. Was this helpful? serbianattack1410 10/1/2014 Gameplay-This game feels like a parody. I know that this game is full of satirical humor, but this game should be taken seriously. It's ridiculous that I bought this game and I have to work hard to just smash and grab. And when I'm on offense, I've got to aim my goat's horn on what's happening and that's it. Now when you're on defense, it's all scripted and I'm basically just moving around, pushing or throwing, or just destroying everything I can. I've got to think of what I'm doing and I can't just smash and grab because that'll screw up the whole game. The challenges seem fun but when I do them I'm just stuck in a linear path and I can't do anything but stand around and smash things. The moving around on the map is pretty unrealistic as well, because your goat seems to be a controlled thing. Graphics-It's pretty damn good, but it has to be taken seriously. The goat and the people just aren't fun at all. The goat's head is a normal head and the "beaks" on their horns are just there for effect. They're almost nonexistent. The goat just looks like a hairy marshmallow, and it's not even a cute marshmallow. He's just a hairy green marshmallow. And the goat's design doesn't fit into the Goat Simulator world at all. He just looks like a floating marshmallow. The people are just generic. This game would've been awesome if the goat and the people were animals. But the goat is a man with a goat's head and the people are humans with tails or horns. If the goat is a bear and the people are human, I'd totally understand that. It's a giant bear humping a human. But if the goat is a human and the people are bear-like animals, then I have a problem. It's like I'm watching some weird sexual fetish from the 50's. Story-The story isn't original, but that's not what I'm calling you out on. It's more like a reality show. And it's full of ridiculous plot lines that I'm sure I won't like. It's probably a plot line that's the reason this game has so much

What's new in Goat Simulator: PAYDAY:

2 Goat Simulator Years after the financial collapse, some 10 years later, the sheeple still haven't picked up the $1 million dollar a pop payment devices that burned an order of magnitude more than they were worth. While this is convenient and bullshit, this piece of it may go beyond the point of no return. It ain't them, it's us, ater all. Goat Simulator is a video game, 'inspired by' Goat Simulator, a PC game made by a guy doing a stealth parody. The following is stated within the interview: Goat Simulator is an 'unofficial reaction' to Goat Simulator. 'We're for real here. We are not just a satirical blog, we're not a funny YouTube video, we're actually for real. Our team, guys we met at a bar and said – yes, you can join our game but no god dammit if you do this as a method to get paid to make your existing games. Seriously. Lets make this as an actual career thing. It's us being us.' I like the idea of 'you can do this stuff too' They've had some PR gaffes on the way, mostly with a string of tweets showcasing what looked like a cave-dwelling Goat. While the writing is usually comedic and slightly stalker-y, it seems like they're aiming to not burn bridges. These guys aren't Americans, though still based in California. Its probably lighter than your average US tabloid coverage. They weren't trying to be 'the biggest crapfest ever produced' as my friend Giap-Dung (owner of Black Shoe Diaries) reported after interviewing them. They're just being honest – online gamers normally love this kind of game, though if that was all, it wouldn't be worth the trouble. Why The Persistence Of The Footprints I've been talking to these goats since 2009, whereby they were looking for creative control with a new game. 'Goat Simulator' has been around since Summer 2014, a stealth parody of new wave anime, shoe-fetish, salt-of-the-earth humor. The Footprints of the Goats download a few months before the game lands
