An interactive system of gameplay, inspired by games of complexity, which demand a lot of thinking and cause the game to be no less difficult, but, in contrast to a conventional board game, it offers more "human" feedback. Unlike board games, interactivity requires the player to think, and this means that players can become caught up in their own game. To complicate matters further, different tactics are required for different problems on each level, changing the nature of the game.

This is, in effect, a complete (or nearly complete) game in its own right. This expansion is recommended for experienced players of On Completeness & Dissonance. It does not have a special difficulty scale, but is significantly more challenging than the base game. It is aimed at those players who want more from the game, and want to test their skills. On Completeness & Dissonance: On Completeness & Dissonance is a game that combines a well known mathematical puzzle, the Sudoku game, with the challenge of constructing a logical theory. The aim of the game is to use arithmetic and logic to solve a specific, logical mathematical problem. The game consists of 60 levels of increasing difficulty, a number of "special puzzles" and special "tricks". The objective of the game is to "complete" all the levels. ## **What's new in Knights Of Honor:**

**Chapter Nineteen: And Then...** The first thing which Pelni discovered as she eagerly approached was the pool of blood, a large amount of it, as she saw it stained all of the floating parts of Danesa's body. In the light, Pelni could see Danesa's features, sunken and bloodied, and she saw sores on her face. The skin around Danesa's eyes and nose was swollen, and her head was thrown back, showing the multitude of scratches which adorned her neck. Danisha's hands were on the metal of the bed, moved tightly as if she was struggling to move them, and when Pelni leaned over to see her face more clearly, Danesa's eyes flew open. "What happened?" she whispered. "What happened to me?" Pelni was looking down as she spoke to her; she couldn't speak, I'm not even sure I can understand her, she thought. "They came and carried you from the castle... Danesa, please, you must be calm, you're safe now, we'll take care of you." "I have to take care of you," Danesa answered, and somehow she managed to straighten her back; she swiped at her face, and when she noticed the slash against her forehead, she let out a low, angry sound. "Dammit!" she swore, "I failed... I'm tired of being nice, but it's to no avail... What did my children leave me? So tired! So fucking tired!" "They're all okay, Danesa, they're fine... Kevin... and William... and..." Pelni had to think for a moment. "I don't know, I just don't know what to tell you. I remember you asking me to get the others out of danger. I promised you that I'd see to it, and I have. You were asleep, the others are safe." "I should have been watching over them," she whispered, "I should never have let them out of the castle..." "The others got out okay, Danesa, really, you were safe," Pelni offered the reassurance, "You were sleeping when we found you." "That doesn't make me feel any better," she answered. She took a deep breath, as if to simply demonstrate some sort of control over herself. "So how did you get here? How did you find me?"
