Raster Images Raster images, or bitmap images, are created in a pixel-by-pixel manner with each pixel of the image being displayed as a dot or square pixel, which are sometimes displayed as a grid on a computer screen. An image is made up of dots of various colors, numbers, or different patterns. In a raster image, the dots represent the thickness of the image. The more pixels a computer has, the clearer an image can be created and the more detail can be contained within that image. The pixels are arranged in a grid-like format where each pixel represents a dot on a computer screen. However, in Photoshop, there can be an array of pixels that cannot be represented physically, which is the pixel map. In Photoshop, the pixels can be individually altered by changing their size, color, or other attributes. Individual pixels are arranged in rows and columns, which are separated by a one pixel space or stitch line. The rows and columns are called the pixel map. Example of a pixel map: Color/RGB values are found in the pixels at the end of a row, and they fill up the column next to it. Combined with the same color and layers, the pixels from top to bottom layer provide a variety of images. Photoshop Uses as a Creation Tool Photoshop is not only a content creation software, it is also a bridge between the computer and the digital camera. Photographers often use Photoshop to manipulate pictures before converting them for printing. Because of Photoshop's versatility, it is also widely used in many industries like designers, photographers, and graphics professionals. Photoshop is great for retouching, editing, and organizing images. It also allows images to be merged or manipulated into one another, which can include resizing, recoloring, cropping, or drawing images. The image is converted into a rasterized format so that it can be viewed on a computer screen. Photoshop is an image-editing tool that creates layers, which hold individual areas of pixels or even a range of pixels. Photoshop layers are used to create different designs on images. The layers can be combined with one another and moved back and forth within the layers of a document, which makes it easy to manipulate images easily. Using the Move Tool, the user can move each

Q: How to work with two queries inside one query? I have a big problem with mysql I have a table CREATE TABLE `data` ( `id` int(11) NOT NULL, `data` mediumblob NOT NULL, `timestamp` int(11) NOT NULL, PRIMARY KEY (`id`) ) ENGINE=InnoDB DEFAULT CHARSET=utf8; and i have a table CREATE TABLE `inputs` ( `id` int(11) NOT NULL AUTO\_INCREMENT, `data` mediumblob, `timestamp` int(11) DEFAULT NULL, PRIMARY KEY (`id`), KEY `inputs\_data\_idx` (`data`,`timestamp`) ) that i use to record the value of the input, date it was written and the value too now i want to work with this data, so i need to get the latest value from the data table and all previous value like this: SELECT IFNULL(inputs.data, data.data) data timestamp FROM ( SELECT data MAX(timestamp) as latest FROM data WHERE id = 1) as data LEFT JOIN inputs ON data.id = inputs.data WHERE data.id = 1 ORDER BY latest The problem is that mysql tries to search for the latest and then the last value so the order of the output is wrong so how can i work with two queries inside one? A: Try this SELECT IFNULL(inputs.data, data.data) as data, MAX(timestamp) as latest, data.id, data.data FROM (SELECT data, MAX(timestamp) as latest FROM data WHERE id = 1) as data LEFT

Q: WordPress URL Redirection I've seen that I can add a simple rule to my WordPress site's.htaccess file: Redirect 301 /oldpage But I'm wondering what will happen if the old URL is on an already existing article page, such as: /support/some\_old\_article/ Can I use the above rule in conjunction with the /support/some\_old\_article/blog/ link, which I want to point to another specific article page? I would like to have my WordPress site retain a consistent URL structure, but how can I determine whether the page the URL refers to exists, and if so, redirect to the appropriate page? A: That will work just fine.
