TIME TRAVEL, A THOUSAND YEARS IN THE FUTURE The introduction of damage multipliers (It may have been possible to guess these, but the implementation for our beta-testing was flawless. This is an excellent result, which we'd like to show you.) (The comments made by Sword Intelligence is similar to the thoughts being conveyed in the game at this point.) What's new in Elden Ring:

... There's a really good documentary about this game that you can watch on YouTube which can give you a little more of a 'How it's made' feel to. Another thing you might want to take note of is that it really is made of many, MANY people, and the credits should tell you most people in the credits are credited for their contributions. Also: There's an official report of MASSIVE amounts of code being deleted during the 1.1 patch. The patch is apparently 700k LoC or more has been removed and 1.5k is unknown. I would likely need a few week's worth of free time to even decrypt what's being removed. To the best of my knowledge, the people who write the mod files don't actually have the source code, only a script to process the source code from someone else. So, good luck! Read through the plot description, I should clear up some of the details on the MS's. Spoiler for plot details: Spoiler for the story: The first act, after you've defeated the monsters and explore the area, you and your companions are basically negotiating what to do next. There's a considerable amount of political and economic

decisions that you're being forced into. You can maybe ask for something in exchange for people joining your party, or you can let them join out of desperation. It appears you'll be going to the area with Chiron where the myth of the Ultimas first began, others who have visited in the past have chronicled all sorts of stories, sights, people, and lore. Also, wher do the monsters come from? It's pretty clear there's a hostile corporation that needs you to recover a key and destroy another group, but it is also possible that it could be a fake corporation. Maybe this was a crazy group of "gangs" who's actually all from a friendly organization. It's a bit unclear which side to play on, but it looks like the competition/war has been going on for a lot longer than you realize. You also have a chance to become a part of the main group and join their settlement, but you might also be forced to leave it behind. So what are the other factors to consider, you'll have to make some difficult choices and investigate the entirety of the Land Between. To me, it looks like it's made so that your decisions, that you make, will affect those

Re: MOMA and the Media I think that this exhibit should be removed from MOMA's walls as completely as possible. It's a disgrace to American history. The majority of those paintings are political propoganda and the like. And some of them are not even that great. Re: MOMA and the Media What about the infamous Nazi Supremacist? I remember that it was one of the in your face, Nazi's done it to themselves. As a general rule for me the Nazi's are not "great" paintings. Hitler was a poor artist with no ability to get his message across. Re: MOMA and the Media Actually, his ability to create beautifully realistic paintings did endear him to the German public, who viewed his work as "the American art of war" during the war. Among Hitler's admirers in other countries, however, the Nazi Party included Russians, Blacks, Arabs, as well as anyone who "belonged" to the master race and admired National Socialism. Re: MOMA and the Media There are some real nutjobs around, but finding a nice one from the Nazi Party is a little difficult, I agree. But then the Nazis, the Japanese, and the Peronistas are three of the most bedeviled organizations of the 20th Century, right along with The Monique's. Ah, the time has come, it seems, to change the subject. Let's discuss the site's layout. Re: MOMA and the Media Rabbit, I've rarely seen a more effective curation of political propoganda in New York City. I assume that in the future historians will treat this collection favorably as an accurate portrayal of the artists' state-sponsored endorsement of Hitler's war against the Jews. Re: MOMA and the Media Originally Posted by Rabbit The point was not the paintings, Rabbit. I was not trying to say the paintings are great. The
