Vista Start Menu
Emulator Windows XP
Start Menu Emulator is a
tiny and portable
application that makes
the Start menu of your
Windows XP look like the

one in Vista. It is very simple to use, as there are no configuration properties involved. Since installation is not a prerequisite, you can drop the program files anywhere on the hard disk and click the executable to run. Otherwise, you can move Vista Start Menu Emulator to a USB flash

drive, memory card or similar storage unit, in order to run it on any machine with Windows XP effortlessly. An important aspect to keep in mind is that the Windows Registry does not get new entries, and files are not left behind after removing the tool. A standard file deletion is suffice to accomplish

this task. Once initialized, the Start menu automatically gets the appearance of the one found in Windows Vista. It features a blur effect, pinning system, and recent items list, among others. Although Vista Start Menu Emulator does not create an item in the system tray area, it runs in the

background. Its status can be deactivated by terminating the process from Task Manager.

- * Supports Windows XP and all of the following

Editors' Review With Vista Start Menu Emulator, you can easily bring the Vista Start Menu to your Windows XP system. The software gives you the ability to view the Vista Start Menu and customizes it to your liking. You can, for instance, pin the system to the taskbar.

Vista Start Menu Emulator is a convenient tool to make Windows XP act like a Vista machine. What It Does Vista Start Menu Emulator is a simple tool to customize the Start menu of Windows XP to look like the one found in Windows Vista. It lets you pin system icons to the Start menu, pin

programs, and pin folders. Additionally, it lets you add and remove items from the system tray. When you run the tool, it will overlay the Windows XP Start Menu with a blurred version of the Vista Start Menu, making your original menu look like the one in Vista. After making some customization on the

Start menu, the tool saves your changes to the system registry. To make changes, you have to either select an item from the system tray or click the Start menu. After that, you will be able to customize the Start menu to your heart's content. Vista Start Menu Emulator requires a Microsoft.NET

Framework 3.5 and Windows XP Service Pack 2 or later to run. Features With Vista Start Menu Emulator, you can make the Windows XP start menu look like the Vista Start Menu. The tool lets you pin system icons to the Start menu, pin folders and programs to the taskbar, and even remove items from the

system tray.
Customizing the Start Menu is not a simple task. That is why Vista Start Menu Emulator comes with a comprehensive set of customization options. Using these options, you can pin files, folders, and programs to the Start Menu, pin the system to the taskbar, and remove

items from the system tray. The tool is also very easy to use. Before making any of your desired changes, you need to select an item from the system tray or click the Start menu and then customize it.

Customization options in Vista Start Menu

Emulator: On the Start Menu, there are a

number of properties available for customization. The first is the Start menu name, which is the name of the program that is pinned to the Start menu. The next is the width of the Start menu, in pixels, which can be adjusted freely. Next, you can customize items to be
