Photoshop has been the industry standard image manipulation program for so long that its name has become a verb. It is common parlance to say that an image has been "photoshopped," or even just "shopped," meaning that it's been edited or manipulated. It uses a layer-based editing system that enables raster image creation and altering with multiple overlays that support transparency. Adobe promotes Photoshop as a tool for professionals.

However, beginners can use Photoshop as well with many helpful tutorials on the market that train users in how to use Photoshop's various features. All images: DC Comics This year, Aquaman has traveled deep into the depths of the Pacific Ocean to explore the lost world of Atlantis. Now, he's back, and he's bringing a raging monsoon and a few other surprises along with him! Aquaman #12 hits stores on November 22, and it features an explosive cliffhanger. We've got a preview of the first four pages of this extra-sized issue, plus a look at some new artwork by Fiona Staples. As you can see, Aquaman is taking this trip to Atlantis alone. Aka-Manhattan has been abandoned by everyone save for Mera and Ocean Master (and

Yoresh, but he's too busy trying to stop Aquaman from abandoning Earth to save his life). The Water Lords—the rightful rulers of the planet—are nowhere to be found. And still, it doesn't stop King Orm from fighting Aquaman for ownership of Atlantis. It's the start of Aquaman's final showdown with Orm, and in his first major battle of the year, he faces not one, but two opponents. As the explosive events of this issue unfold, we get our first glimpse of the soon-to-arrive Deathstroke, who comes to challenge Aquaman for the throne of Atlantis. It's rumored that he's aiming to take over the entire planet and its surrounding oceans. If that weren't enough, Aquaman is also beset by some of his

deadliest enemies at the moment: Sauron (who is apparently still able to walk around under the sea). Aka-Manhattan has been overrun by a group of Trident-wielding Aqualad clones who are currently terrorizing anyone who gets in their way. And then there's Orm. At least, there was Orm, until he got hit with a massive electric bolt during the civil war that was just fought. He now lies broken on the floor, and Mera is in the process of healing him. As Aquaman tries to figure out how to stop his enemies, Mera gets a call on her communicator about Orm's condition. She immediately leaves and flies off to get her former husband. Hopefully, by the time Aquaman's united his team of allies, Mera

and Orm will be able to make up and reconcile. Meanwhile

Student medical educators' experiences with anti-vaccine messages: A qualitative study. Medical professional societies have produced several position statements highlighting the risks and contraindications associated with anti-vaccine information and misinformation. However, there is little research examining medical educators' experiences with anti-vaccine content or their decision-making processes when responding to anti-vaccine content. To explore medical education students'

experiences with anti-vaccine content, the factors they believe influence their decision to engage or disengage with anti-vaccine content, and the strategies they use to respond to anti-vaccine content. Qualitative study. Interviews with medical students from the University of Saskatchewan (n = 10) were analyzed using a thematic analysis approach. Students participated in multiple anti-vaccine workshops during their training. They learned about the risk of autism from informal sources, mainstream media and anti-vaccine websites, but they perceived that the University of Saskatchewan (U of S) had an obligation to address anti-vaccine messages within their training as part of its obligation to ensure

safe and competent physicians. Anti-vaccine content did not frame medical students' decisions to engage or disengage with the content, nor did it change the decisions they made. Students' responses to anti-vaccine content were characterized by the use of search strategies, explicit exclusion of the views of anti-vaccine individuals, and skeptical questioning, followed by advocacy for vaccination.
