What distinguishes it from other image file formats is that it stores the data in an abbreviated form using lossy techniques. The abbreviated nature of JPEG is what enables it to compress and transmit an image efficiently, even though it does mean that you sacrifice a little quality in the process. Newer file formats are available to recover some of the quality lost by the JPEG compression. JPEG stands for \_Joint Photographic Experts Group\_. It was defined in 1994 by a meeting of eight of the worlds leading computer scientists from some of the leading labs in the world, including Robert C. N. Glass of Xerox PARC, Steve Jobs of Apple Computer, Michael D. McCreary of Stanford University, and David A. Thompson of Carnegie Mellon University. The JPEG group met in 1994 and defined the JPEG format (which would become the standard for still images). JPEG is based on the \_CCITT\_ (International Telegraph and Telephone Consultative Committee) \_T.81\_ standard. JPEG is a lossy format and as a result, almost every picture you take in the world is encoded using this format. When you open a JPEG file in Photoshop, the image appears in layers, as you would expect, with each layer representing a different adjustment that was done to the image. The layers are in the order they were added to the file, from bottom to top. ## Opening and Saving Files JPEG images can be opened in Photoshop using the file menu and selecting the JPEG format from the Image Type drop-down list. Alternatively, you can view the file in any

LA Galaxy midfielder David Beckham would've been proud of how the team showed up at UCLA to take on UC Santa Barbara on Friday night. As for the soccer players, they just wanted to get some points. In what was billed as a showcase for the league, the Galaxy entered the game against the Gauchos as the most publicized squad in the contest. There were no gimmicks, no big-named guest announcers, no "celebrity" crowds, and the soccer media didn't care. "It is fantastic to be here. I love coming to this town," said referee Drew Fisher after the game, in which the Galaxy beat Santa Barbara, 2-1. "This is a great turnout. The crowd and the coaching staff were great. It was a terrific atmosphere, and that's the way it should be. We're here to play soccer." That's a major step forward for the first-year MLS team, which hasn't necessarily enjoyed the celebrity treatment of other minor league teams. Still, the Galaxy did show up and play. "The crowd was phenomenal," Galaxy President Chris Klein said. "It was a great atmosphere for a club. We certainly had our fans there. We knew when we came in that it would be a fun game for everyone involved." Coach Bob Bradley said the biggest challenge of the weekend was preparing for a true sellout. The stadium attendance was 19,347, which was 13,000 more than the club estimated. "We're used to bigger crowds, and the guys had to adjust to it tonight," Bradley said. "It was a good test for us, and we showed up with a big answer." The last time a UCLA representative was to play the Gauchos was Sept. 10, 1997. The Gauchos won 2-0. "I don't think our guys were prepared for the atmosphere," Bradley said. "I thought the level of the atmosphere was very high and the Galaxy are excellent at controlling that." Bradley described the atmosphere as akin to a college game, even though the crowd was filled mostly with university students. "It was a good atmosphere for soccer," he said. "It can be a little harder on the

Juan Suárez is out. Juventus announced on Wednesday that the Spain international midfielder would return to action three months after undergoing surgery on a fractured left leg, a week after their season finished with a 4-0 defeat to Real Madrid at the Santiago Bernabeu. Suárez, 30, had just a few minutes under the Friday deadline, when he scored a goal against Barça B in the Europa League on Thursday night, after one more appearance on the bench in the league against Milan. "After careful consideration, we have made a decision to send Suarez back to his club," Juventus said in a statement. "His recovery is in progress and as such we will not take any further risks with his health. "We wish to thank him for his commitment and wish him well for his career as a footballer." Suárez injured his leg after falling in an abandoned tunnel in the 1-1 draw with Barça on 11 May. The midfielder had been in the stand for the second leg of the Champions League final against Real Madrid, and ended up on crutches, only providing enough information about what the function should be doing but not why this particular function does what it does. Depending on how critical this new requirement is, the value of the date ranges that have been defined may be different. A date range defined as "from 1 Mar 2011 to 15 Jun 2011" may be a little more useful than one with the same date range written as "from Jan 11 to Jul 15". For such simple tasks, you may be able to relax the formatting requirements and just get the defined format as the output. You may see what the output looks like in the function, and assume that this is the output you want. If you can see what the function is doing, and how it can do this, then there is no problem. You also need to be a little more permissive with the data input. Often you have to define how the function will operate, but you don't have to tell the function how to get the data you want. I would look at it this way: "I'm going to give you the range of data I want, and I want the data to be in a certain format." You don't necessarily need to tell me which data to get, but you do need to tell me how to get it. In
