Jepssen Mediabox Hd M3 | Firmware Support | Download.. Firmware - Jepssen Mediabox Hd M 3.All firmware files are uploaded by users based on variousCristiano Ronaldo will leave Real Madrid after 16 seasons at the Spanish champions, the club have confirmed. His final game for Los Blancos will be the Champions League final in Kiev on 26 May. Ronaldo wants to play in Italy after leaving the Bernabeu in the summer of 2017. The 33-year-old Portugal international has scored 228 goals in 365 appearances in Madrid and won five league titles and seven Champions League trophies. He recently said he had made a decision on where to play his next season, but Madrid have confirmed he will be leaving. "Cristiano Ronaldo's contract with the club is at an end and we wish to assure that everyone at the club wishes him the very best in his career as a player and as a person," the club said in a statement. "His contribution to Real Madrid is one of the most important aspects of our history. We will do our utmost to ensure that his contribution to the club will never be forgotten." Last season was the club's first since the Lisbon side won the Champions League in June 2018. Ahead of the final, Ronaldo had said: "I wanted to have a year in which to say goodbye to the club. Now it's time to say goodbye to the club and to all the great friendships." He said his decision was not based on money and he would be concentrating on the 2018-19 season before he made a decision about where he would play next.Q: Find a fixed point of the following transformation Find a fixed point of the following transformation:  $x=e^{2-x}$  So far I have  $x=2-e^x$   $2=e^x-e^x$  Using the identity  $a^2=a$  I get  $2=e^x$  and  $e^x=2$  Then I have a few answers, but this one  $2x=2$   $x=1$  Which is wrong. A: Rewrite the first equation as  $e^{-x}=2-x$  and use the second to get that
