### **Features Key:**

**Virtual Presenters**: 4 Virtual Presenter in different styles and sizes.

The 4 Virtual Presenter are designed for game presentation and user interaction. All Virtual Presenter can be loaded with a variety of lighting effects, images and colors.

**Sketch/Screen-Shot tools**: Each virtual presentaor has an exclusive UI interface for it. We also provide you tools with our SDK to add your own features to this interface.

**Advanced user interaction**: With our motion code you can manipulate your presenter in any direction, with airplay or touch.

**Animation support:** Presenters in different styles support animation. You can create interactive animations for your presentation.

#### **Virtual Presenter Pro:**

## **Features:**

- **Sketch / Screen capture tool:** Screen capture a section of code for developers to debug the internals or visualize the architecture of your application.
- **Keyboard input:** Presenters can be interacted with using a keyboard. Highlight a codeblock and press enter
- **No plugins required:** This is a super easy way to create videogame presentations without changing any settings
- Pre-made effects: Ready made sprites and sounds available in our SDK.
