The game's name is perfect. Your tentacle is your only reliable friend in this game. As a very clumsy human, your only way to get around the entire game is to use tentacles, and you have to do it while avoiding dangerous obstacles and climbing your way through fun mini-games. The game lasts about 20 minutes, and will have you laughing, jumping in excitement and seeing what the game can actually do to you. It's difficult to describe, and should be played to be appreciated. If you like games that are fun to watch as well as fun to play, then Tentacular is a game for you. i have played tentacular 2 many times and i have to say this game is very well made and the main system is really fun, the levels are well designed and i believe the developers have really put effort into making this. it is something you should play, its easy to pick up but with effort you get the best part out of it. i have played and completed tentacular 2 (the game sequel of the original) and i have loved it just as much as the first one. love how you can easily swap levels when you make a mistake. i have only have one good problem, that would be with the "resume" system. it crashes if the sae levels are connected during the game. it cannot be fixed but for me it is not a problem

because i dont play during the save feature. also the "finish" screen is kind of strange. on this game theres a map feature but i believe it would be better if it showed you where you are during your game time, because it would help you save your life. also there is a feature to skip or go through certain minutes of the game but if you do that you have to restart the "resume" feature, i believe there should be a way to skip the skipped parts if you activate the "skip" button before you are killed or something like that. also how much points you get depends on your tentacle movement, when you reach the top you get points faster. if you perform well and push your tentacle faster you will get more points, if you are playing the game and you manage to complete the level without killing yourself or the game crashed you will lose your points. the "attacking" system is a mystery but i guess thats the fun
