Autodesk replaced the mainframe with the PC as the workstation and the PC graphic display with the monitor. AutoCAD started out with four basic drawing applications: DWG (Drafting and Graphic Design), DFX (Drafting), RFX (Raster Graphics), and PDF (Pages for Finishing). The last two are dead programs that were discontinued. In 1989, Autodesk introduced Construction (construction), Multimedia (MDS), and Computer-Aided Engineering (CAE) for AutoCAD. Today, Autodesk offers CAD products in nine areas: Architecture and Construction, AutoCAD, Civil, Construction, Electrical and Maintenance Design, Mechanical and Industrial Design, Multimedia and Entertainment, Paper, and Product Design. Autodesk has recently released a major upgrade to AutoCAD and started a new CAD with new Autodesk Navisworks. Autodesk Navisworks is used for the creation of 3D-modeled engineering designs. AutoCAD is used for architectural and engineering design, product design, industrial design, architectural and engineering drafting, and similar design and drafting jobs. AutoCAD is used by individuals, small businesses, architectural, engineering, and construction firms, and large corporations. The AutoCAD product family has experienced multiple upgrades and generations since its initial release. AutoCAD 2014 is based on AutoCAD 2013, AutoCAD 2014 is a major update. It also enables an additional set of industry-specific features and support for specific fields. AutoCAD LT is typically priced in the $2,500 to $3,500 range. AutoCAD LT supports the following industries: Agriculture Automotive Construction Consulting Government Marine Manufacturing Naval architecture Professional services Research and development Services Transportation AutoCAD LT is one of the few CAD applications that retains engineering features such as Mechanical and Electrical design and drafting. It is often used in small businesses because of its lower price and limited features. However, AutoCAD LT lacks some features of the other AutoCAD applications. AutoCAD LT has applications for desktop, mobile, and web. AutoCAD LT is not a portable application, but it does have a mobile application and a web application, both of which require the installation of AutoCAD LT on a computer. AutoCAD LT uses XLL (XLL = XLESharedLibrary) technology, which requires that all AutoCAD LT users use the same version of the XLL library and must be compiled using the same compiler. Other User defined macro functions can be created and saved to share with other users or on the AutoCAD Exchange Apps. They can then be shared with others, either in stand alone files or in a shared session. See also
