FIFA is an annual football video game series published and developed by Electronic Arts. Initially released on the Sega Genesis in the US in September 1992, it introduced the popular licensed athletes found in mainstream American football, as well as popular clubs around the world. The video game series has evolved its rules since its inception in order to reproduce a more authentic experience while retaining the popularity of the series in its home market. The

original series was successful due to its introduction of licensing deals in the United States that made it much more cost-effective to develop the game than other sports titles at the time (since licensing fees covered development and marketing costs). Over the years the series has become increasingly popular in the United States, accounting for over 80% of sales of sports titles in the country. The series has developed a fairly loyal player base in the United Kingdom, though little to no uptake in Europe. The series has since expanded its releases into other regions, including Japan (FIFA Soccer), South Korea (FIFA Online), China (FIFA Online), Taiwan (FIFA Online 2), and the Middle East (Madden NFL). Licensing has also expanded outside of sports, with Electronic Arts having been awarded rights to the NFL, Major League Baseball, and NHL. Gameplay FIFA is a soccer-only game, featuring only football, with all teams and players being created by the developers. It is the most popular soccer video game franchise in the world, and is a staple in the sports video game genre. The gameplay is divided into three separate game modes. Gameplay in this game mode is only accessible in the online gaming environment. A 2D pitch is used to play matches, with the ball being controlled using a virtual stick. The object of the game is to score more goals than the opponent. Single
